A WAY OF DECORATING

zircon

Zircon is an exquisite wallpaper collection in a tight and modern style. The stripe designs are overlaid upon each other like layers of the earth. And the large medallion is inspired by precious stones and minerals. Dry matte colours, suede printing and a mica finish take turns to result in a continuous tension between the elements. This interaction in combination with colours like chocolate brown, wool-white to deep carmine create the striking appearance of this stylish wallpaper collection ZircOn.
